

OPPORTUNITIES

Graduate Developer

Brady is the leading software systems supplier to the Commodities market. Over the last year the company has continued to grow both organically and inorganically within our market sector despite the difficult trading conditions. To support this continued growth the company is looking to strengthen its Development Team in Cambridge

We are looking for a recent Graduate to be responsible for the specification, design, development, maintenance and support of Trinity, Brady's Risk Management and Trading application. You will be involved in all stages of the development lifecycle from analysis/specification through to testing and support. As well as developing your technical skills there will also be the opportunity to travel and develop your client facing skills.

In addition to your excellent analytical and problem solving skills you will have a 2.1 degree in mathematics, computer science or other numerate degree and have a strong interest in software development within the financial services industry. You will be highly motivated with a professional approach to work some work experience gained working for a software vendor would be an advantage. The skill set we are looking for includes:

- Knowledge and experience of developing in .NET
- Experience of one or more of the following; - C#, VB, Web service development, WCF, WPF and Silverlight, Oracle/Oracle Development tools SQL or PL/SQL
- Ability to interpret written requirements and technical specification documents.
- Ability to code software according to published standards and design guidelines
- Knowledge and experience of Microsoft development tools/programming environment
- Programming using latest Microsoft development tools.

Brady PLC offers a competitive salary and benefits package together with excellent career development and training opportunities.

If you are passionate about new technology with the drive to move things forward then we are interested in hearing from you
